

## Misinformation Group

Our S.G.L. interview has been released as a warning item to Stavrosian families that they should keep ever vigilant for their safety.

A Stavrosian misinformation group was led by a retired Air Force Major. We will call him John as we do not want to expose his name or his position. John said in an interview that his group had been assigned in 1967 to mislead potential investigations that could reveal the Stavrosian presence. It began in 1966 when the Air Force accidentally filmed a UFO during a missile test.

To keep the incident hidden it was necessary to get involved. John contacted S.G.L. members that were working within the C.I.A.. He advised them to do whatever was necessary to put a stop to the investigation. They were able to reach the office of Major Mansmann. Although the Major did not understand why the C.I.A. was involved, they made it clear to him to stop (cover-up) the whole incident. It was not to go any further.

The story stayed buried for some 17 to 18 years. It reappeared again in a tabloid in 2020. Then it was picked up by a radio show broadcast. This was of concern to the S.G.L. so the misinformation group stepped back in to try to make the story look like a hoax in 2021. Their efforts were somewhat successful. The story has not yet made it into mainstream media.

It is not that the Stavrosians want to keep it all from the public, it's that they can well see how the men of earth treat each other. It's no wonder they have such a level of fear. Their resistance to come forward is entirely justified.

As the S.G.L. incorporate themselves into government agencies to keep watch over potential risks for the Stavrosian community, their work goes on in the shadows of society. It's the way of Stavros.
