

Security Report

The scientific study of UFOs conducted by the University of Colorado was commissioned by the U.S. Air Force. This was conducted to support the pre-arranged conclusion that UFOs were not real. This report was intended to stop further study of UFOs as well as put a stop to reported sightings by civilian personnel. A symptomatic course of ridicule has been conducted by official personnel in order to silence new reports and also cover up the truth.

Behind the scenes was a quiet movement from the S.G.L. to protect the Stavrosian people. A man named David Marler has been a concern of the S.G.L.. He is a UFO historian and is thought of as a security risk by the S.G.L.. Several S.G.L. members contacted Marler through field personnel of the Stavrosian library. David couldn't be swayed to discontinue his work. Marler was in part responsible for the 2007 government study group on UFOs and their reported sightings. The group study ended in 2009. The government re-established funding for a continuation of a new study group that has been active even now in 2021.

Most of their research comes from Navy documented evidence. Their field interviews, reported sightings and locally obtained physical evidence. Reports compiled by the group are held in government files. The government has put out misinformation and cover stories for 65 years. The S.G.L. has joined in on the effort since 1960 although the government had no idea of the S.G.L. involvement in keeping the secret.

The work was successful until 2020 when the Navy came forward with the story of UAPs (unidentified aerial phenomena). This put the Stavrosian Guard on alert. It is now more imperative that the field researchers for the S.G.L. find / locate Stavrosians. It has become only a matter of time before, not only the government, but the world learns of their existence.

The "Searchers" will start looking for the Stavrosians ever more diligent. The other Alien life that exists on Earth will have to be more guarded than ever before. UFO study has never been a threat to these people. It has unfortunately led to the question, are there Aliens among us? Credible research organizations like MUFON have found the answer to be yes. The existence of Alien Life is nothing new.

Their safety has been tied directly to earthman's arrogance. As long as man can't believe in their existence, they won't waste time looking for something he doesn't believe is here.

The government has not wanted people to know the truth out of fear. The S.G.L. didn't want anyone looking too closely. The work was the same, but their motives were very different. Today a study group of Stavrosians are working on a way to come out of hiding, joining mankind. This has proven to be a monumental task. They have seen how earthmen treat each other, it's just plain scary.

Reported by George Dalton
Charleston, South Carolina.

Authorized release through MT. Pleasant
S.G.L. Security Group.
