

Thank You Letter

**From The Stavrosian Guard and Library Office of Research and Information
The Desk of Director / Head Librarian Georgia Wheaton**

To our wonderful incredible Field Researchers; I wish to take this opportunity to first thank everyone for their steadfast loyalty to the Stavrosian families. It is by your commitment that has made the Stavrosian libraries across the country and around the world the success we have enjoyed to date.

We have been fortunate to have had the support of ufology groups as trusted friends, with their fellow research enthusiasts. Although the world will little know the work being done, it will be the beneficiary of the technology with all the help man has received from the Stavrosian community.

If I missed anyone group in this mailing, please pass along my heartfelt appreciation to all those within the framework of these groups. I can't call everyone out by name - " security protocol ". Please know I have the greatest respect for each one of you.

The Ukrainian reports were sent in by S.G.L. of Europe; to all of you involved, thank you. From England, thank you to the London Aerial Observation Group for their input. From Argentina the Southern Hemisphere UAP group. Their reports in the past helped put together our connection in Argentina. Thank you to the Berlin group of Aerial Phenomena for their interviews and reports on families and believers.

Two of our members are involved in MUFON. Thank you so very much. I understand how difficult your work has been. Finally, I want to send out a special thank you to our new Ohio connection RUFOS. Their website has been instrumental in the increase of new registrations. Their webpage has become popular among new families.

For the S.G.L. members that stand ready to go anywhere on short notice to do whatever they must to help and protect the families. We all owe these men and women a great deal. Many of you have been helped by them.

We all give you thanks for how much you have done over the years. You do make a real difference. As I close, please be of good heart and mind. May next year be as good again.

Georgia Wheaton
